

# ESG Corporate Workshops.

Cultivating Community is here to support you, your teams and organisation in addressing your ESG Agenda via knowledge based hands-on immersive experiences and evidence based designs, builds, advice and guidance.

## A bit about our workshops

ESG and the SDGs are critical elements for every organisation to take responsibility for. As an accredited Social Enterprise and Non Profit Cultivating Community is delivering many programs to address the system wide challenges in our society and we are ready to share, scale and support you and your organisation in your strategic goals around ESG.

We can come to you and meet you and your organisation where you are on the ESG journey and can consider opportunities to deliver at our Rooftop Farm at Burwood Brickworks or elsewhere.

## Who is Cultivating Community?

Our purpose is to inspire a healthy and just world by providing nourishing and informative food and gardening experiences. We embrace people, place and culture through food and gardening by nurturing wellbeing and a sense of belonging.

By investing in Cultivating Community to help support your ESG goals you are supporting our work with CALD Communities including the Deaf and Hard of Hearing, members of the community who for whatever reason may be facing challenges in their lives and people living within Public Housing.

We are an experienced 25-year-old organisation rich in knowledge around food-based builds, designs and maintenance as well as the ability to engage communities of all kinds socially via the power of cooking, baking, gardening and design of creative immersive co-designed spaces.

Those 25 years have seen an evolution of corporate and community-based language in relation to environmental, social changes that Cultivating Community has lived and breathed for its whole existence. That combined with a robust evaluation process linked to the Sustainable Development Goals, Social Connection Index and the requirement of regular reporting to Government means we are strong performers in relation to the G of ESG also.

We look forward to working with you and building a relationship to help achieve goals that benefit our society together.

Environment  
Social  
Governance

# ESG 3 Stage approach to making change

## Stage 1: Quick and easy wins

## Stage 2: We're on our way

## Stage 3: Big picture potential

For more information  
contact us at

[info@cultivatingcommunity.org.au](mailto:info@cultivatingcommunity.org.au)

## Stage 1:

**Volunteer with us** at The Roof Top Farm, Burwood Brickworks Shopping Centre.

**Workshops** get in touch with us to discuss a workshop package we can tailor to your requirements.

**Landscape and Design Services** our HORTUS landscaping team can address all your landscaping needs starting with design consultation and moving all the way through to the installation of your new garden.

## Stage 2:

**Sponsor a program** to help support community engagement through growing, cooking, and sharing culturally appropriate food.

**Sponsor a HMSM CALD Scholar** with CALD Employment Pathways.

**Green Star advice** and guidance related to food and growing.

## Stage 3:

**Integrating ESG** into contract management
